

# Image Processing - Challenge Project

## OST — Ostschweizer Fachhochschule

Lukas Ribi, Dominik Castelberg, Pascal Christen

April 12, 2021

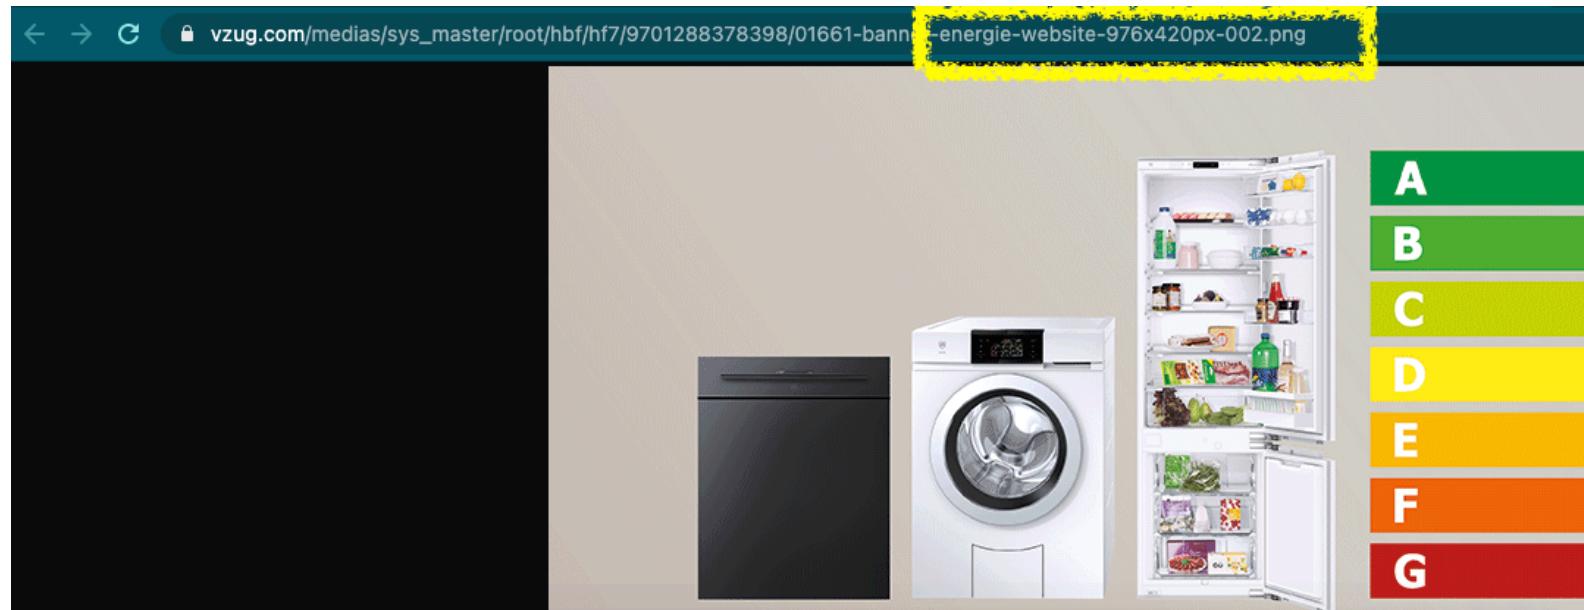

DS1 - Thomas Bocek

## 1. Introduction

# Goal

Problem : Often you need to resize, adjust quality, and convert on demand:

- Responsive Websites
- Upload of an image

Solution : Our ImgProcessing service converts the image **on-the-fly** and provides a simple *REST API*.

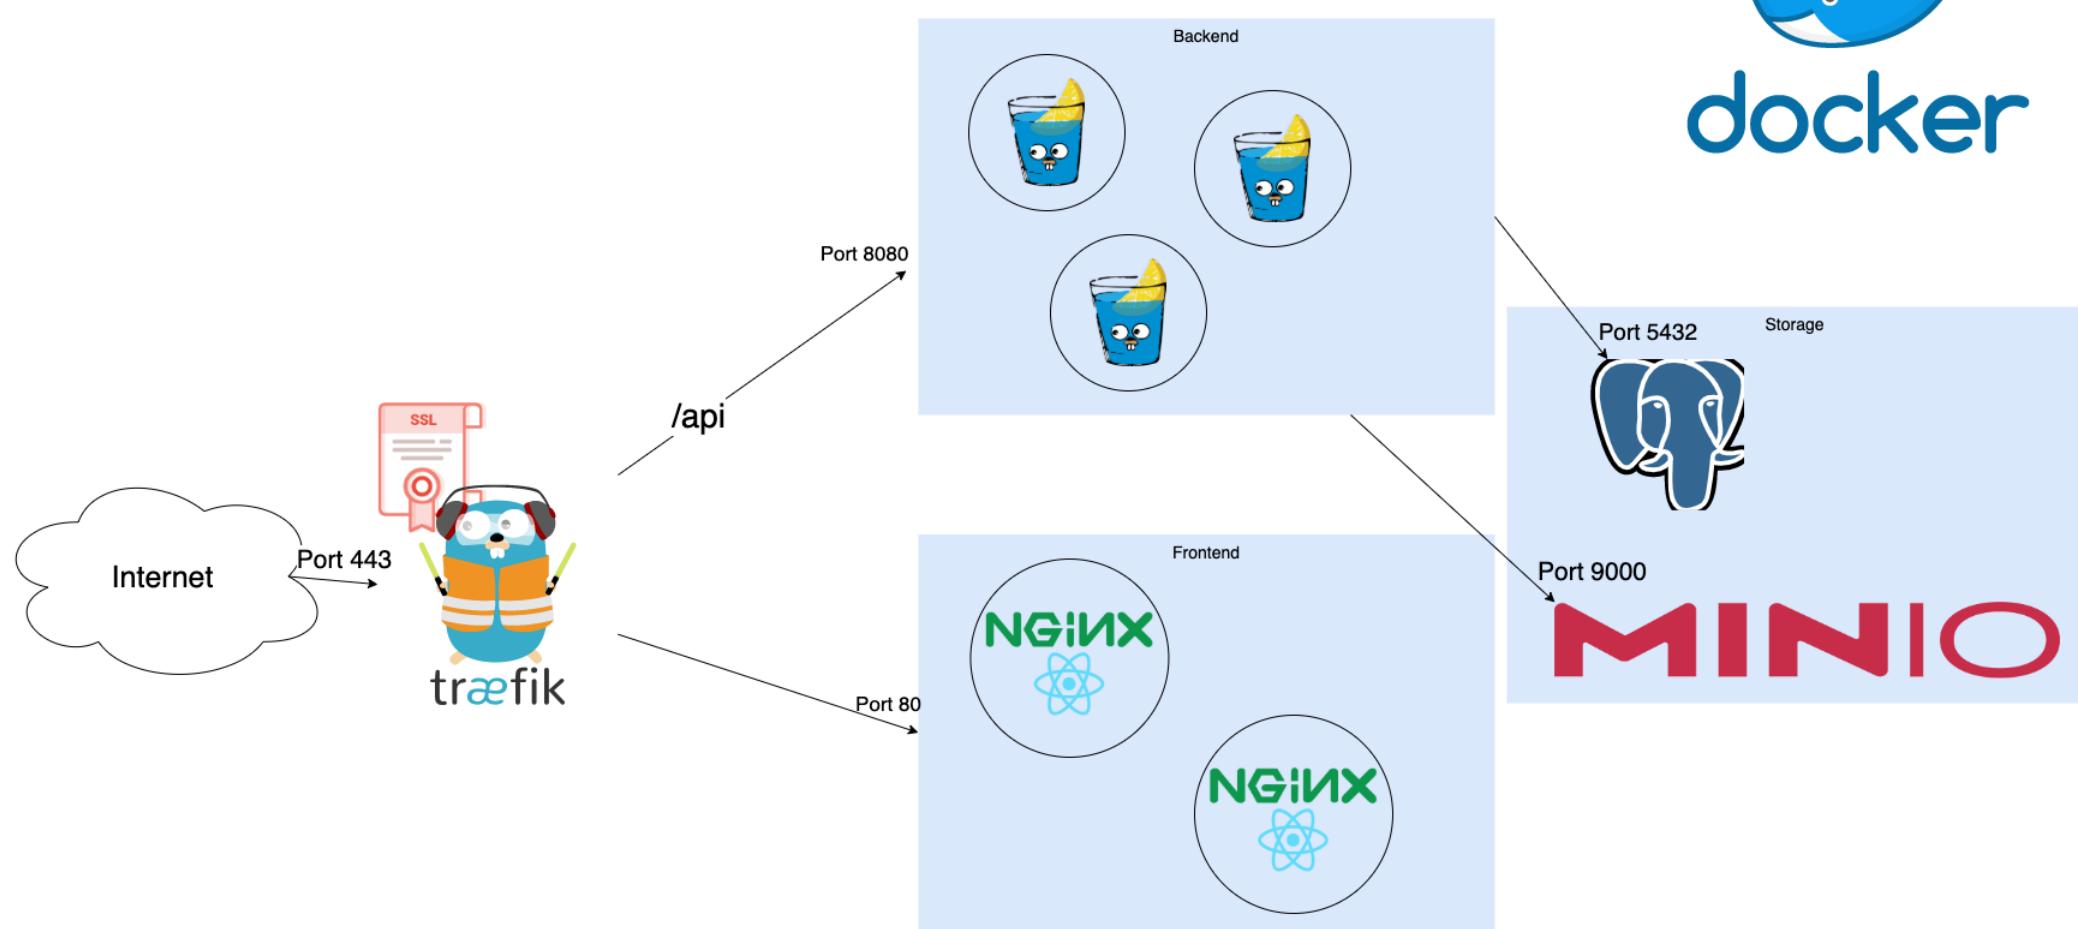

## 2. Technology

# Setup

- Backend
  - `go` (1.16.3)
    - `gin` (1.6.2)
    - JWT
- Frontend
  - `ReactJS` (17.0.2)
    - Material-UI
    - Ausgeliefert durch `Nginx` (1.19.9)
- Loadbalancer
  - `Traefik` (2.4.8)
- Storage
  - `PostgreSQL` (13.2)
  - `MinIO - Object Storage` (RELEASE.2021-03-26)
- Präsentation
  - `LaTeX`

## 2. Technology

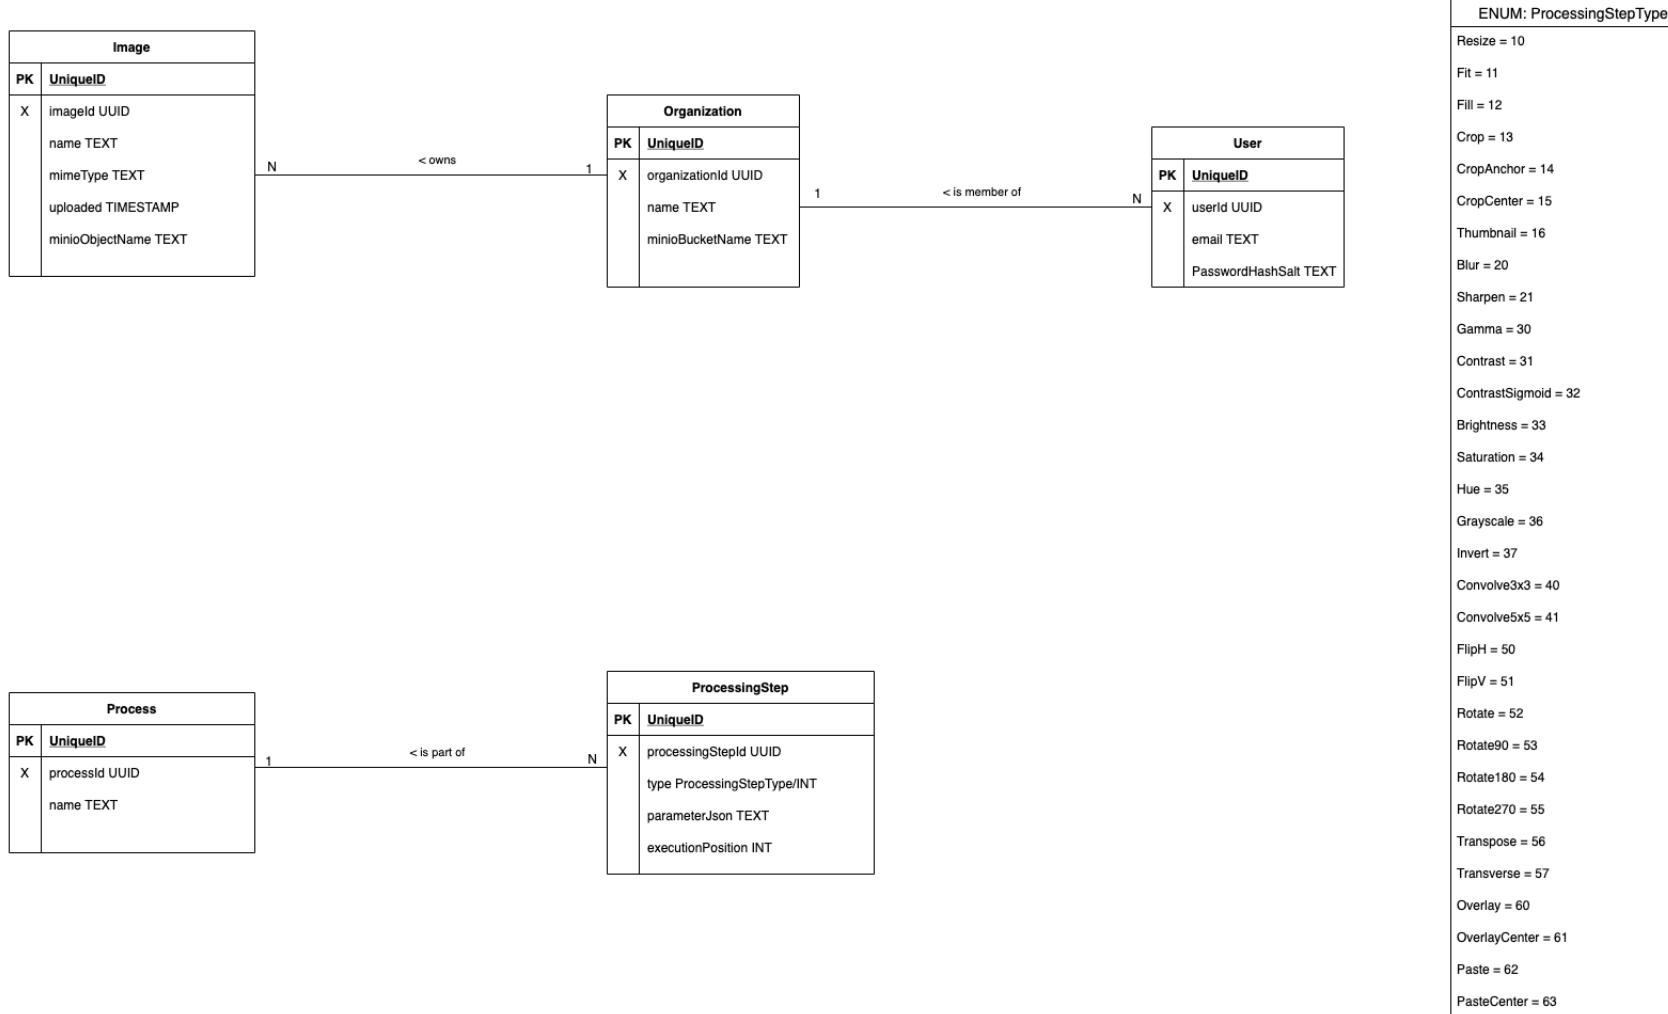

# System Diagram

### 3. Development

# Data Model

imgProcessing Entity Relations

### 3. Development

## Github Actions

- Docker Images - builded and versioned by Github Actions
  - Frontend
  - Backend
- Security by scanning for **CVE**

📦 2 packages

📦 <b>frontend</b> latest	⬇️ 276
Published 8 days ago by imgProcessing in imgProcessing/backend	
📦 <b>backend</b> latest	⬇️ 270
Published 8 days ago by imgProcessing in imgProcessing/backend	

### 3. Development

## docker-compose

- Prod and Dev environment
- Restricted access on prod

### 3. Development

## Loadbalancer

Traefik:

- Docker Socket mounted:
  - + Autodiscover
  - - Security
- HTTP -> HTTPS Middleware
- Self-signed cert with `mkcert` for development
- Healthchecks

### 3. Development

## Backend

### 3. Development

## Frontend

### 3. Development

## Storage

#### 4. Legal

## Fulfillment of Requirements

- Simple Frontend: React Frontend
- Loadbalancer: Trafik
- Two instances of a service: Backend and Frontend
- One storage backend: PostgreSQL and MinIO
- JWT Authentication: Used
- FOSS: Used
